

# JOB POSTING: ELECTRIC MOTOR MECHANIC / TECHNICIAN

Page 1 of 2

**AIRMATIC INC, Malvern, PA**, is an industry-leading supplier of mechanical products and services to the Industrial, Construction and Utility Markets. We have full-time and/or part-time opening for a skilled Electric Motor Repair Technician in our modern, well equipped, Malvern Service and Assembly Shop. Our Technicians perform electro-mechanical repairs on Customer owned electric vibrator motors, pneumatic and electric tools and equipment, and assembly, testing and repair of our private branded equipment such as Motor Starters, and Hopper Car Gate Openers.

## RESPONSIBILITIES:

- Inspect, diagnose, and perform major or minor repair work on electric vibrator motors, electric and pneumatic tools, pumps, controls, valves, and related equipment
- Prepare work orders, time estimates, and reports detailing repair work performed and parts required in a clear and concise manner
- Assemble, test and document repaired equipment in accordance with AIRMATIC/manufacturers' instructions and specifications
- Occasionally assist Customers with technical questions regarding the use and maintenance of vibratory motors, tools and equipment purchased
- Communicate with manufacturers' technical support for assistance in repairing motors, tools and equipment
- Perform repair and maintenance on shop, warehouse, and facility equipment
- Assemble and test Company branded electric vibratory motors, pneumatic and electric tools, equipment and controls
- Assemble and install Company supplied equipment at local off-site facilities

## POSITION REQUIREMENTS:

- Strong mechanical and technical aptitude
- Problem solving skills
- Detail oriented, well organized, neat and orderly
- Ability to prioritize activities needed for prompt turnaround of Customer tools and equipment
- Highly motivated with focused ambition and drive
- Recognition and acceptance of the business principle that providing Great Customer Service is Job #1 for every Associate
- Ability to understand and carry out complex oral and written instructions
- Skilled in the use of the variety of tools, equipment, materials, methods, and procedures used in the repair and assembly of electric motors, mechanical tools and shop equipment
- Strong understanding of occupational hazards and safety precautions of the mechanic trade
- Ability to rapidly move from job to job as priorities and Customer demands dictate

## APPROPRIATE SKILLS, ATTRIBUTES AND INTERESTS:

- Considerable knowledge of mechanics, working knowledge of electric circuits, motors, controls, and power transmission products
- 3 years repairing/maintaining electric motors, power tools and equipment
- High School Diploma or equivalent; Vocational School Degree in a skilled trade is a plus
- Valid Pennsylvania Driver's License
